

## My Spring in Color

Miscellaneous and colorful news from my studio | Flensburg, April 2023

Hello dear Max Mustermann!

First of all I would like to give you an **insight into my studio**:

It is part of a great artist community and is located in a beautiful old building right in the pedestrian zone of Flensburg city center. When I enter my large studio, which consists of two rooms and additional storage space, I find that drinking coffee together with my studio neighbor, who is a Goldsmith, is an important step on the way to the canvas.

Before I choose my **colors** from the shelf and pick up the **brush** and spatula, I like to play music, mostly meditative and inspiring music. When I'm in the studio and feel comfortable and balanced, I can focus all my energy and creativity on painting, and when things turn out well, the positive energy is also reflected in the painted picture.

You will find the canvas in my **painting area**, which is the heart of the studio, so to speak. I have space there for paintings up to a maximum of 10 square meters in size. It's also important that there's always something good to snack on in the studio, for me it is a vital part of creating a **positive studio atmosphere**. That's the best way for me to get into the creative process.

### The motif "Symphony of Spring"

I think spring is great! With the power of spring, life is sprouting up again, the buds on the flowers are appearing and everything is fresh and green, and it's getting warmer and more colorful again. It is as if with the beginning of spring the feeling of the **joy for life** spreads again. Through my art I have tried **to abstract this spring experience and implement it in colors** - the orange, green, blue, purple, white, lilac, magenta, pink, orange and yellow shades arranged to give a floral character to the work. The colors enrich each other and in their interaction result in a refreshing, lively symphony of spring.

### **Symphony Of Spring XXXL 1**

The huge format of 240 x 150cm is one of my favorites, I really enjoy painting on these bigger canvases. The large area allows me to bring even more dynamism, vitality and energy to the canvas. Paintings in this format achieve an impressive effect and they captivate every viewer.

**> To the shop: Symphony of Spring XXXL 1, 240 x 150 cm, ready to hand 10.990,- USD**

However, I painted the idea of "Symphony of Spring" in different formats and variations, each with its own charm...

155 x 105 cm,  
**Symphony Of Spring XL 1**  
2690,- USD

120 x 83 cm  
**Symphony Of Spring M 1**  
1490,- USD

155 x 83 cm,  
**Symphony Of Spring L 1**  
2290,- USD

---

**Smartest Format: 100 x 70 cm**

## S formatted paintings from 2023

The S format **fits almost anywhere**, which is a great advantage, and is available both **horizontally** and **vertically**. By the way, in some rooms, an S sized picture can also be used as a "companion" to another Nottrott painting; if the style is repeated in a room, a room appears even more harmonious.

The artwork "Positive Energy S 3" has a **particularly attractive price of 790,- USD** on my website, since this painting is not offered through other international art portals, but exclusive on my own websites. It is a thank you to all direct buyers like you for their trusting purchases - therefore with special THANK YOU prices.
